📍 Stockholm, Sweden

TECHNICAL SKILLS

Frontend technology
Typescript, Angular, Bootstrap, Next JS, Vue JS

Database
SQL

Code Quality – SonarQube, ES Lint

DevOps
Jenkins, Azure, Ansible, Splunk, Docker

Tools
Docker, Visual Studio Code, Sublime

Mock-up
Figma

Versioning Tool
GIT, Codex, Source tree, Bitbucket, GitHub Desktop

Methodology - Agile Methodology & SCRUM, JIRA

Testing – JEST, Smoke Testing, Unit Testing
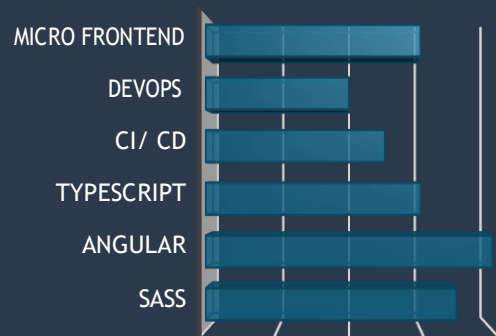

Accessibility – **a11y**, WCAG Standards, Axe Dev Tools

Professional Summary

   With over 13 years of experience in creating responsive websites and applications. Committed to staying updated with the latest industry trends and technologies to continuously improve and innovate.

- Built dynamic and interactive user experiences with Angular, React and Typescript, leveraging component-based architecture.

- Developed and maintained micro frontend architectures to enhance scalability and team collaboration.

- Conducted unit testing and integration testing using JEST to ensure code quality and reliability.

- Optimized application performance through efficient bundling and code splitting with Webpack.

- Utilized Azure DevOps for continuous integration and deployment, streamlining the development workflow.

- Containerized applications with Docker to ensure consistent environments across development, testing, and production.

- Implemented web accessibility standards (WCAG 2.1) to ensure inclusive user experiences for individuals with disabilities.

- Skilled in using Git and platforms like GitHub, GitLab, and Bitbucket.

- Worked in Agile methodologies (Scrum) to manage and deliver software projects efficiently, ensuring timely and high-quality releases.

- Coordinated and executed testing phases (Development, Testing, UAT) to ensure application stability and functionality before production release.

- Collaborated closely with the Product Owner and Scrum Master to refine user stories, prioritize the backlog, and ensure alignment with project goals and timelines.

- Proven ability to work effectively in cross-functional teams, fostering a collaborative and inclusive environment.

- Flexible and adaptable to changing project requirements and priorities, with a willingness to learn new technologies and methodologies.

- Implement and uphold best practices in front-end development, including code quality, testing, and documentation.

- Participate in code reviews to maintain high standards of code quality and share knowledge with the team.

- Coordinated with cross-functional teams to refine and clarify project requirements

- Passion for problem-solving, attention to detail, and a strong sense of ownership over your work.

- Effective communication skills, with a collaborative mindset and the ability to work both independently and in teams.

Project Summary

Allianz Technology [Senior Developer]

Claim-net represents a significant advancement in Allianz's efforts to modernize and optimize its claims management processes, providing a robust tool for OEs to enhance their operational efficiency and customer service.

➢ Collaborate with other developers to integrate various micro-frontends seamlessly into the Claim-net application.

➢ Develop and maintain user interfaces using Typescript based NextJS, ensuring a responsive and intuitive user experience.

➢ Write and maintain unit and integration tests using JEST to ensure code quality and reliability.

➢ Participate in code reviews and provide constructive feedback to peers to maintain high code quality standards

Citi Bank [Senior Developer]

This project aims to develop a comprehensive banking application. The application will provide users with a secure and efficient platform to manage their banking activities, including account management, transactions, and user authentication.

➢ Secure user login and registration using JSON Web Tokens (JWT). This ensures that user sessions are protected and only authenticated users can access certain features.

➢ Implemented state management libraries like Redux to handle application state efficiently.

➢ Write and optimize SQL queries for data retrieval and manipulation.

➢ Deploy and manage the application on Microsoft Azure.

➢ Creating unit test cases via JEST in Angular.

➢ Code Review with peers to ensure the code quality.

➢ Ensuring the accessibility is covered in application.

AXA Insurance (Developer)

AXA US Employee Benefits module is the comprehensive resource for managing and understanding your benefits. This module is designed to cater to the needs of various stakeholders, including Employers, Brokers, Advisors, and Employees.

➢ Develop and maintain user-friendly interfaces using Angular.

➢ Responsible for writing clean, maintainable code and integrating front-end and back-end components to deliver high-quality applications.

➢ Proficient understanding of cross-browser compatibility issues and ways to work around such issues.

➢ Ensure the code is adhere to the coding standards.

Xerox App Studio (Developer)

The aim of the project is to create an app for XEROX Printers using weblet.

➢ Strong expertise in front-end UI development with HTML 5, JavaScript, CSS, Bootstrap, jQuery Web/Mobile responsive web designing knowledge.

➢ Proficient understanding of cross-browser compatibility issues and ways to work around such issues.

➢ Ensure the code is adhere to the coding standards.
